- Worked with different projects using C#
- Developed API based systems, Mobile Applications and Desktop Applications
- Utilized Raspberry Pi for IoT Projects using C#

RESEARCH & TRAINING

SOFTWARE TESTING TRAINING

Feb 2017 | UP Diliman

ANNOYANCE AND FRUSTRATION RECOGNITION SOFTWARE

Mar 2014 | Undergraduate Thesis

PHILEOSOFT SOLUTIONS

May 2014 | Intern

PROJECTS

REAL-TIME RFID REGISTRATION

I worked as full-stack developer on this project, working with a team. Appointment system for the company's customers to install their RFID Stickers to be used in the expressway Toll Systems.

Stack: ReactJS, Vite, ASP.NET, MSSQL

AI PERSONA CHAT BOT

An AI Persona Chat Bot that helps you with specific topics the model is trained on. I worked solo on this project using the latest tech stack with NextJS and AI Technology.

Stack: NextJS, ReactJS, Prisma, Clerk, Vercel, Generative AI, Vertex AI

SAAS PLATFORM MOBILE APPLICATION

I was lead front-end developer for this project, helped plan, design and set up initial back end. This project is the mobile version of an existing SaaS Platform.

Stack: React Native, PHP, Symfony, api-platform, PostgreSQL, MongoDB

PLOKERNOW

A public web application for easily setting up a Planning Poker Session. This is a personal project.

Stack: VueJS, Quasar, Firebase, Firestore

PLANT TEA-TA

Web Application for our local Milk Tea business. This serves as the POS System as well as inventory system and gives us sales analytics. I have a also integrated rewards systems for frequent buyers.

Stack: VueJS, Quasar, Firebase, Firestore

DISCORD BOT AND WEBSITE

A Discord Bot I created for the game Grand Chase. This bot accepts commands and gives specific recommendations based on the user input.

Stack: VueJS, AWS, S3, Lambda, DiscordJS, Heroku, NodeJS

SHOP DIGGY

I worked as the front-end developer on this project, this is a mobile application to help users get the best deal from different e-commerce websites

Stack: C#, Xamarin

TARA: TRACKING AND ROUTING

Tracking and routing application like Grab and Uber to reserve seats and view user location

Stack: C#, Xamarin, ASP.NET, Google Maps

HOME VISION: FACE RECOGNITION

Security system that uses face recognition to detect unrecognized persons entering the home

Stack: C#, EmguCV, WPF

HALOMET: VOICE COMMAND NAVIGATION

A navigating system embedded on a helmet that utilizes speech recognition to navigate, including collision sensors.

Stack: Raspberry Pi, C#, Web API, Google Maps, Windows 10 IoT
